

Project Overview

- ❖ Client: Beech Hall School
- ❖ Project: Science and Tech block
- ❖ Challenge: Restricted Access
- ❖ Turnkey Service: Full service

Modulek Services

- ❖ Design
- ❖ Project Management
- ❖ Groundworks and Foundations
- ❖ Internal fit-out and finishing
- ❖ Playgrounds and ramps

Objectives

To demolish the existing building, install piled foundations and the new traditional-looking Science and Technology block.

Solutions

Modulek installed the building in a single day after a complex delivery procedure due to difficult access issues.

Results

Modulek was able to deliver the new Science and Technology block where traditional build couldn't.

The building was installed in a single day after a complex delivery procedure involving an additional mobile crane and an off-site vehicle change location to negotiate the extremely difficult access.

Internally, specialist equipment and teaching facilities were fitted for the dedicated science lab and design technology room.
