

Project Overview

- ❖ Client: Wolverhampton Wanderers
- ❖ Project: Gymnasium and Office
- ❖ Challenge: Timeframe

Modulek Services

- ❖ Project Management
- ❖ Groundworks
- ❖ Off-site manufacturing

Objectives

To add a gymnasium extension to the rear of an existing building and a further four-week window to construct a two-storey office extension, main reception and press room which was completed as the second phase.

Solutions

Modulek was able to install the new training facility within a very short window of time.

The project was completed in 2 phases.

Results

Modulek provided Wolverhampton Wanderers with a very quick building solution to meet their growing requirements.

“The speed of construction helped us massively, in terms of finishing the season and not having part of the training ground to now having the building. It will help us transition into the Premier League - especially the gym. We can do a lot more work inside on our reactivation and warm - up in the gym.

It allows us to be able to achieve so much more than we could before. From our perspective, it's been a big part of our strong start to what is a very tough season.”

Conor Coady, Player.
